

## **NOTIFICATION TO STUDENTS (GM) FOR THE 1st – 5th YEAR**

### **Progress Plan of the Faculty of Medicine of the SZU in Bratislava to ensure completion of the school year 2019/2020 for the study program General Medicine years 1-5.**

#### **UPDATED on April 23, 2020**

The Extended Dean's College, held on 20 April 2020, decided on the following procedure for securing the end of the 2019/2020 academic year for the State Examination year Study program in General Medicine

**The academic year 2019/2020 will be completed according to the original schedule for these years.**

Already at the beginning of the crisis, the students were instructed and invited to use all available forms of distance education and **especially for self-study** so that they were theoretically ready to take the yearly examinations at the originally planned dates.

Attendance of lessons will not be renewed by the end of the school year!

All available forms of distance education, including TEAMS (the manual is available on the SMU website), are provided by individual institutes, departments and clinics of the SMU.

Examinations and credits will be performed according to the valid schedule from **May 25, 2020 to July 3, 2020 by distance form.**

Exam Schedule (dates) will be published through MAIS until **the 07.05.2020 with the two possible dates.** Examinations will take place in whole groups. Students will be required to apply for the 1<sup>st</sup> deadline and must be observed by all students (except for an objective obstacle with documentary evidence), students of different groups may take part in the re- examinations at the same time. Distance testing logistics will also be published on SMU's website until **07.05.2020.**

For distance form of examinations, each student must:

- Have a functional smartphone or notebook with a functional camera (with sufficient power supply)
- Have a room in which he / she will be alone and not disturbed. This will be documented by the actual capture by a camera, which will then be placed so as to capture it throughout the test, to demonstrate that he is alone in the room throughout the test and has no way of looking for information in any way.
- Present an identification card or a student card.

23.04.2020

doc. MUDr. Martin Gajdoš, CSc.  
Dean of MF SMU in Bratislava
